CUSTOM SIZING ROCKERZ® SKATE GUARDS

Video instructions at www.RockerzSkateGuards.com

SETTING THE CUT POINT

STEP 1: Determine both the model name & exact size of the skater's blade

STEP 2: Using the Rockerz® Cutting Guide, find the correct cut point based on the skater's specific blade model & size.

STEP 3: Slide the adjustable stop bar on the sizing platform to the desired cut point. Lock the stop bar by tightening the knob. The cutter is now set to trim all four guard segments to identical lengths.

CUTTING THE GUARD SEGMENTS

STEP 1: Keep fingers away from blades. Unlock the safety latch & open the cutter to its maximum open position. Insert the guard segment along the sizing platform under the cutting blade & against the stop bar.

STEP 2: Make sure the guard segment sits securely on the platform base & against the stop bar. Squeeze the cutter handles to cut each guard segment.

Rockerz® Skate Guards

Patented ergonomic rocker base
reduces impact & increases mobility
